

100 New Points

— of light —

What will success look like?

- ☀ There will be energy and excitement that creates synergy around reaching new people for Jesus Christ in creative and innovative ways.
- ☀ There will be laity taking the initiative to reach a new population of people, the unchurched and de-churched, in safe simple ways.
- ☀ There will be people and congregations intentionally looking out beyond where they are now, praying and making plans, implementing the plans with hope and joy and seeing what God does. New relationships will be developed with people who today strangers are becoming friends and family in community together.
- ☀ There will be people who have their lives changes by learning to be more aware of their neighbors and inviting people to experience what it means to learn about Jesus and to have a relationship with Jesus.
- ☀ There will be people engaged in worship who today are without faith and hope.
- ☀ The energy of being sent out shall permeate and light a fire of hope and transformation.

What do we mean by “Worship Experience” = 3 essential pieces

Connect - Provide or create space and time for people to gather, so that they are in community together focused upon connecting with each other and with God through sharing, singing, music, conversation, prayer and laughter. It is a time to build new relationships with people and with God.

Grow - Learning life lessons based on the teaching of the Bible and the experiences of each other and other people of faith. This is the time to question and discern together life meanings centered in the teachings of Jesus. It may provide moments for the sacraments, reading together, conversations and discussion, and a safe place to learn and express faith and questions about faith and life. It may include the Proclamation of the Word, scripture reading, prayer, etc.

Serve - Offer opportunities for people to respond to what they have learned in practical life application activities. This may be in the offering of self and resources; it may be in creating an opportunity to serve others, it may be a challenge to change a life pattern, it may be a way to get involved in the community at a food bank, visiting the sick, inviting others to come and connect, grow and serve.
